Gotha and Lineages of Understanding Marx and his point – Karl Marx (1879)

By Karl Marx

Introduction
By Mao Zedong
And so in fact a youthful reading in Marxist senses of a French Maoist perhaps – he then reads

this in militant fashion and calls it “student politics and mass politics” – he can tell that the mass politics is all that matters and that it will win the popular front tactic and elections – now capital and state will work for Chinese Mass line – and that then is the work of history – read close in line with lived experience – we thank Sirohi.

I. In the process of Capital and Grundrisse, even Economic Manuscripts

I mean there is a form of representation called capital, even Grundrisse and even Economic Manuscripts – this working life of a intellectual class

in the sense of whose position is in the university and is expressing its bourgeois class consciousness in the partage of their own lives.

II. Mass Politics and Gotha for the Intellectual Edition or Golden Edition

Now the intellectual organizes the proletariat and wins the union and wins the elections and now has passed a line for in fact Communism – which represents the whole of the poor and wins himself in a Brumiare.

III. Read this with Engels, editing this I mean –

Just the party, the poor and the intellectual class reading the Manuscripts.

Part II – Friedrich Engels and his Edit of this Lineage Work –

I. Party of the New Type
II. In A Democratic Liberalism
III. Engaged for the proletariat
IV. Winning
V. Brumiare changing for the proletariat.
VI. Manuscripts re-read as successful.
VII. Manuscripts describing alienation, and living experiences of intellectuals.
VIII. Living experiences – how Gotha is correct economics – not the partiality of

bourgeois states, but the extended mass line of proletarian parties in the state – this is a simple French Jacobin true point.
